CONTENTS

Volume 27, Issues 1–6

International Journal of
MATHEMATICAL EDUCATION in SCIENCE and TECHNOLOGY

Issue No. 1, JANUARY

An algorithm for solving multivariable multidifferential equation problems W. SABRY 1

The effects of random fluctuating environment on interacting species with time delay G. P. SAMANTA 13

Two combinatorial identities derived from the recurrence relation D. M. SPRESSER and J. S. FRITZ 23

On the geometric sum of iid random variables K. C. CHAE, H. W. LEE and S. S. LEE 29

The role of representations in students' intuitive thinking about infinity D. TIROSH and P. TSAMIR 33

Mathematizing the van Hiele levels: a fuzzy set approach S. PERDIKARIS 41

Self-adjoint approximants P. J. MAHER 49

Integral test and Abel's test WEI-CHI YANG 57

Constructing mathematical examinations to assess a range of knowledge and skills G. SMITH, L. WOOD, M. COUPLAND, B. STEPHENSON, K. CRAWFORD and G. BALL 65

Self-inductance of a long wire: infinite multiple loop approach Y. C. LEE and W. N. MEI 79

A criterion for estimation tasks J. CLAYTON 87

Problem posing/solving and linear algebra J. BRODY and S. ROSENFIELD 103

On the teaching of complex numbers A. OXLEY and L. L. RAJ ... 123

Classroom notes 131

Letter to the Editor 159

Issue No. 2, MARCH

Parametric analysis of performance trends for mathematics degree students vis-a-vis directional bearing on entry qualification D. O. IHEJIETO and S. I. EMENALO 163

Representing trochoid curves by DUOPOLY procedure UZI ARMON 177

Singular value decomposition and the nearest matrix of a lower rank ARNOLD J. INSEL 189

Use of absorbing Markov chains as a measurement model for the process of analogical transfer MICHAEL G. VOSKOGLU 197

What kind of materials are needed to build the structure of calculus? SIMÓN MOCHÓN 207

A comparative study of secondary mathematics curricula: Florida, USA and Tamil Nadu, India G. Thomas Bellarmine and Patricia J. Wentz 215

Some elementary remarks on vibrations with inherent time lag D. Schieber 225

A comparison of two probabilities of misclassification due to the quadratic discriminant function Atsu S. S. Dorvlo 233

Simple algorithms for finding squares of numbers in various bases Nguyen-Huu-Bong 239

Another handshaking problem: graphs of order p whose degree sets contain $p-1$ elements Diane M. Spresser 247

Random triangles B. L. Burrows and R. F. Talbot 253

Use of spreadsheet program to solve parabolic partial differential equations using Crank–Nicolson method A. Kharab 261

A system framework for fuzzy sets in the van Hiele level theory of geometric reasoning Steve Perdikaris 273

A mixed quadrature rule for approximate evaluation of real definite integrals R. N. Das and G. Pradhan 279

Demonstration of systematic improvements in the application of the variational method to the harmonic oscillator W. N. Mei 285

Classroom notes 293

Issue No. 3, May

A chemical equation as a representation of a class of linear Diophantine equations and a system of homogeneous linear equations R. Sabramaniam, N. K. Goh and L. S. Chia 323

Planetary distance François Rafie 329

Sections of pyramids, perspectivities and conics N. Hungerbühler 335

Properties of the Brahmagupta matrix E. R. Suryanarayan 347

Further generalizations of the Fundamental Theorem of Calculus J. Klippert 355

Least squares approximation of a function T. C. T. Kotiah ... 365

The effect of guidance-oriented periodic testing on mathematics-test anxiety and achievement of low achievers in NCE mathematics O. A. Adedayo 373

Learning number theory with a computer algebra system Y. L. Cheung 379

Testing the equivalence of multiple regression models with additional data R. Radhakrishnan and D. R. Robinson 387

An instructive example of absorbing Markov chain Pyung Il Yu ... 397

Absolutism and Eurocentrism in Mathematics and the Access alternative Roseanne Benn and Rob Burton 405

Magnetostatics and the volumes of the platonic solids Paul Shutler 413

The out-of-kilter algorithm for solving network problems Warwick J. Comley 421

Fibonacci numbers—finite and infinite series P. Glaister 429
The Lorentz force law and Maxwell's equations in symmetric form Andrew Vasilakis 443
Reliability modelling based on fatigue crack growth D. G. Harlow 447
Classroom notes 455

Issue No. 4, July

On special orthogonal eigenfunctions and eigenfunction expansions M. D. Phillips 479
Another design for sundials. N. Hungerbühler 483
Generalized products and associated structures on Euclidean spaces F. Fineschi, R. Giannetti and K. B. Marathe 493
Project investment with equity financing J. M. Carter and M. R. Wilde 507
Some criteria for the absence of closed trajectories J. Tian 515
Platonic solids and the missing groups R. P. Burn and G. A. Sherman 523
A vector product in $\mathbb{R}^2$ A. R. Walter 535
The construction of formal logical systems without axioms A.-M. Blewitt and J. Costello 539
Mathematical statistics: on the Hartley–Bartlett test G. Perera, H. Carrasco, V. Díaz, M. Fontán, A. Mehr, C. Mendoza, C. Pereira, N. Saráchaga and A. Stein 553
Linear algebra over various rings J. D. O'Neill 561
On corrected summation of alternating series A. Chakrabarti and Hamsapriye 565
An investigation of different approaches to using a graphical spreadsheet model of population dynamics R. Beare 583
Matrix inversion: a computational algebra approach H. Arsham and M. Oblak 599
Chebyshev polynomial solutions of linear differential equations M. Sezer and M. Kaynak 607
Classroom notes 619

Issue No. 5, September

Mathematics: a historical and didactic perspective L. E. Moreno-Armella 633
A partitioning algorithm for solving systems of linear equations T. J. Sheskin 641
Chebyshev series solutions of Fredholm integral equations M. Sezer and S. Doğan 649
Variation in proof standards: implications for mathematics education D. Almeida 659
The solid angle subtended by a circular disc with application to roadsigns I. S. Jones 667
Controllability of linear control systems using Gilbert and Kalman criteria G. W. D. M. Gunawardene and E. Forrest 675

Some interesting properties of the natural number system Y. K. Huen 685
Exploring prime numbers within a spreadsheet S. Abramovich ... 693
Economical rocket flight G. Probert 701
Some unified results on logarithmic means C. E. M. Pearce and J. Pečarić 709
Generalized Laplace equation for a vector potential E. A. Notte Cuello and E. Capelas de Oliveira 717
New directions in the teaching of mathematics, science, and technology K. A. Dolgos and J. S. Elias 725
On certain constants in the series for Bessel functions T. G. Weale, A. M. Cohen and J. D. Griffiths 731
An exploration of student learning in mathematics J. H. F. Meyer and P. Parsons 741
Classroom notes 753

Issue No. 6, November

Lagrange interpolation and Runge's example T. H. Fay and P. G. Webster 785
Alternative derivations for the complex Fourier and Laplace inversion theorems: non-Gaussian convergence factor: S. F. C. O'Rourke and D. S. F. Crothers 797
Linear systems: a column–space approach to Cramer's rule J. Haberl 803
Fractal geometry, a multi-faceted course W. de Jong and M. H. Peel 807
Experiments to investigate instrumental and relational understanding among undergraduates J. A. Anderson 813
A method for the approximate solution of the second-order linear differential equations in terms of Taylor polynomials M. Sezer 821
On the algebraic connectivity of a double covering graph M. Nihei ... 835
Statistical variation in a calculus setting T. C. T. Kotiah 841
A logical characterization of the Euclidean plane, sphere and cylinder P. Bender 849
M-matrices B. L. Kirk and Y.-E. Kuo 855
A note on optimization in integers J. Y. Wong 865
DERIVE assistance to the collocation method for solving potential flow problems A. Marlewski and J. Kolodziej 875
On a coprime factorization of square triangular numbers K. B. Subramaniam 883
pH of simple ampholytes and related compounds. A general, always-converging, iterative algorithm M. E. Cardinali, C. Giomini and G. Marrosu 893
On digit swaps and shifts P. Cerone 901
Operational versus transform calculus: the similarities and the differences M. A. B. Deakin 917
Classroom notes 931
Erratum 949
Index of authors 951
